Now that we're in our new home, we wanted to "officially" thank you for building such a lovely house for us.

All of your workers and the subcontractors did an excellent job. They were a pleasure to work with. They had a positive attitude towards changes that we requested and often suggested modifications that improved upon the original plans. We couldn't have been more pleased with this group. We applaud your judgment in selecting them and your competence in supervising them.

When we started this project back in November 2006, we had no idea that the planning phase would take so long but we're glad that you didn't allow us to rush into a final design. In thinking through all the details, the actual construction was able to go very smoothly. Your suggestions for items such as a south-facing gable, a pre-plumbed kitchen in the basement, and picture windows in the living room have really added to the look, practicality and value of the house. Virtually, every visitor (including the many workmen) has favorably commented on our view, which in no small part is due to the picture windows. We greatly appreciate that you took the time to learn our desires and needs for the house and that you ably incorporated them into the design.

We would gladly provide a recommendation (written or verbal) to any prospective customer that you might have.

Also, thank you for the gift certificate for Delaney's Landscape Center. We'll put that to good use this Spring.
